

Net migration, Registration Sub-Districts, 1851-91

This table gives the net migration proportion (the number of net migrants in a decade as a proportion of the population in the preceding census) for all the Cornish Registration Sub-Districts in the four decades from 1851-91.

For the method of calculating these see Bernard Deacon, 'Reconstructing a regional migration system: net migration in Cornwall', *Local Population Studies* 78, 2007, pp.28-46.
