Abstract

This study investigates the relationship between leadership and knowledge transfer regarding environmental issues in tourism businesses through the lens of small- and medium-sized enterprises (SMEs) in the South West of England. Within the tourism industry, sustainable development is a dominant paradigm and policy makers in the South West strongly encourage the implementation of sustainable management practices within tourism businesses through a wide range of 'best practice' manuals, case-studies and guidelines. As a result of these efforts the South West is leading within and beyond the region with regards to sustainability. However, a lack of understanding exists about the underlying reasons why tourism businesses and in particular SMEs embed sustainable management practices. This has the result that the diffusion of best practice at a local or regional level is often assumed to be present rather than understood. To ensure long-term competitiveness and survival of organisations in tourism – as well as in other sectors – the ability to change and alter one's business practices is vital. In this regard the importance of leadership has been highlighted within the general management literature. However, although leaders within organisations introduce, enact and are accountable for change, research on leadership in tourism is sparse.

Accordingly, an extensive survey (n=193) was conducted with in-depth semi-structured interviews (n=18) of owners and/or managers of serviced accommodation providers in Torbay. The results demonstrate that the leadership style exhibited by owner/managers outside their establishment strongly influences the extent to which sustainable management practices are implemented within their businesses. Moreover, different leadership styles also have a strong influence on promoting behaviour change through knowledge transfer outside their establishment. To a small number of owner/managers, the benefit of sharing knowledge and expertise is clearly understood, but the majority of participants had only started to identify potential benefits for their businesses. Additionally, the results highlighted that a refinement of the Multifactor Leadership Questionnaire (MLQ) was required. The standard three-fold model of the Full Range Leadership Theory (FRLT), consisting of transformational, transactional and laissez-faire, could not be replicated as transactional leadership style dispersed into two strands – leadership through active management-by-exception and contingent reward. Four distinct clusters of leadership behaviour were identified among the owner/managers in Torbay, of which 'Convinced Transformational Leaders' are the most important as they are responsible for driving change through the tourism industry at a local level. Therefore, this study confirms that, instead of a 'one-size-fits-all' policy to encourage widespread sustainable management practices, a more differentiated approach is needed to inspire change and deliver action on the ground.

Acknowledgements

I would like to express my deep and sincere gratitude to my supervisors, Professor Tim Coles and Professor Gareth Shaw for their support and guidance, which was invaluable to the completion of my PhD.

I would like to thank all my colleagues and friends in Exeter and abroad for their support. Especially, I would like to thank Claire Dinan, Kristyna Marceva, Caroline Rook, Rowan Fraser, Hannah Ogilvie, Gergana Panteva and Heather Burgess. Without their friendship, help and moral support it would have been impossible to finish this work.

My special thanks to my sister Chris Wilhelm and my parents Gisela and Ulrich Zschiegner who always believed in me and encouraged me to follow my passion. Thank you.

4.3.4. Piloting.....	112
4.4. Sampling.....	114
4.4.1. Overview of sampling methods.....	115
4.4.2. Selected sampling strategy and sample size	116
4.5. Main survey strategy and execution.....	117
4.6. Explanation of qualitative research	118
4.6.1. Interviewee selection	118
4.6.2. Semi-structured interviews	120
4.7. Validity and reliability	121
4.8. Discussion of the methods of analysis.....	122
4.8.1. Qualitative analysis.....	122
4.8.2. Quantitative analysis	122
4.9. Statistical analysis of the collected data.....	123
4.10. Summary of research methods and data collection	125
CHAPTER FIVE - CHARACTERISTICS OF THE LOCAL TOURISM INDUSTRY IN TORBAY AND ITS ENVIRONMENTAL MANAGEMENT PRACTICES –.....	128
5.1. Introduction	128
5.2. Structure of the serviced accommodation sector in Torbay	129
5.2.1. Socio-economic characteristics of the owner/manager	129
5.2.2. Business characteristics.....	132
5.3. Sustainable business practices.....	137
5.3.1. Environmental management practices among tourism businesses	137
5.3.2. The importance of the environment for owners/managers	142
5.4. Drivers and barriers for change	146
5.4.1. Personal dedication and cost control against an economic downturn.....	147
5.4.2. Guests as a double edged sword.....	152
5.4.3. Pressure to conform as environmental measures become the ‘norm’ and the reluctance to change	153
5.4.4. ‘Stumbling’ into the unknown.....	155

5.4.5. The struggle between accreditation schemes, rewards and the unproven benefits of environmental measures	158
5.4.6. Government and local council.....	161
5.4.7. Drivers for innovation changed over time.....	163
5.5. Summary of main results	164
CHAPTER SIX – KNOWLEDGE SHARING AMONG TOURISM BUSINESSES –	167
6.1. Introduction	167
6.2. Sources of information for tourism businesses in Torbay	168
6.2.1. The number of sources of information for tourism businesses	168
6.2.2. Importance attached to the sources of information used	172
6.3. The modes of and reasons for knowledge sharing with other businesses.....	174
6.4. Type of knowledge sharing among tourism businesses	180
6.4.1. Details about suppliers and trades people.....	180
6.4.2. Information about guests.....	181
6.4.3. Environmental measures.....	182
6.4.4. Information that wasn't shared	183
6.5. The extent of knowledge transfer among tourism businesses.....	183
6.5.1. The importance of close proximity.....	186
6.5.2. Relationship between knowledge transfer and location	188
6.5.3. The effect of seasonality	188
6.5.4. Extent of knowledge transfer has altered over the years	189
6.6. The importance of networking for sharing knowledge among businesses.....	190
6.6.1. The importance of formal and informal settings for knowledge sharing	191
6.6.2. The importance of national networks for knowledge sharing	191
6.6.3. The Importance on regional networks for knowledge sharing	192
6.6.4. The importance of local networks for knowledge sharing.....	194
6.6.4.1. An overview of the local networks in Torbay	194
6.6.4.2. Torbay Accommodation Providers (TAP).....	195
6.6.4.3. The Green Forum	197
6.7. Summary of main results	199
CHAPTER SEVEN – THE IMPORTANCE OF EXTERNAL LEADERSHIP TO TOURISM –	202

7.1. Introduction	202
7.2. The leadership styles of serviced accommodation sector in Torbay.....	203
7.3. Application of the MLQ to external leadership in tourism	207
7.3.1. Step one: assessment of suitability for factor analysis	207
7.3.2. Step two: selecting the type of factor analysis.....	208
7.3.3. Step three: factor analysis - selecting the number of factors	209
7.3.4. Step four: factor analysis – finalizing item selection and description of the four factor solution.....	211
7.3.5. Step five: reliability of the factor structure	214
7.3.6. Discussion of the application of the MLQ to external leadership in tourism..	215
7.4. Identification of different leadership types among tourism businesses	218
7.4.1. Cluster analysis	218
7.4.1.1. Stage one: conceptual considerations for conducting cluster analysis	219
7.4.1.2. Stage two: different techniques for conducting a cluster analysis.....	219
7.4.1.3. Stage three: determining the number of clusters	220
7.4.2. Comparing the differences between the four leadership clusters	220
7.4.3. Cluster descriptions	224
7.4.3.1. Avoidant Leaders	224
7.4.3.2. Passive Transactional Leaders.....	225
7.4.3.3. Motivated Transactional Leaders	226
7.4.3.4. Convinced Transformational Leaders	227
7.4.3.5. Discussion of the local leaders in Torbay.....	227
7.5. The influence of different types of leadership on business behaviour towards sustainable tourism management.....	230
7.5.1. The influence of different types of leadership on the implementation of environmental measures.....	230
7.5.2. The influence of different types of leadership on the perceived importance of environmental issues for their establishment and the region	234
7.5.3. Discussion of the different leadership types and their sustainable tourism management practices	238
7.6. The role of leadership in sharing knowledge among businesses	240
7.6.1. The influence of leadership on sourcing information	240
7.6.2. The influence of leadership on knowledge sharing.....	242

7.7. Summary of main results.....	246
CHAPTER EIGHT – CONCLUSION –	249
8.1. Introduction.....	249
8.2. Summary of main findings, implications and research contribution.....	250
8.2.1. Objective One.....	251
8.2.2. Objective Two.....	253
8.2.3. Objective Three	257
8.3. Research contribution	262
8.4. Limitations of the study	264
8.5. Recommendations for future research	266
