I would like to thank my research supervisor, Joanne Smith, for all her support, inspiration and time.

Thanks also go out to Jennifer Scarff for her help with the co-ordination of interviews, and Tess Drabble for her support and agreement to allow this project to be conducted with ease – without your support, this project would have been ten times more difficult.

Finally, I would like to thank all of the participants who provided a wealth of information. Thank you for your involvement; for taking the time out to be interviewed and allowing me to record your thoughts and experiences.

Thank you all.
