Transforming criminal lives:
A narrative study of selves, bodies and physical activity

Submitted by Joanne Kate Day to the University of Exeter as a thesis for the degree of
Doctor of Philosophy in Sport and Health Sciences in July 2012.

This thesis is available for Library use on the understanding that it is copyright material

ABSTRACT

Over the past thirty years attention has turned to how people leave a criminal lifestyle and develop an adaptive identity. Within the Criminal Justice System in England and Wales there exist physical activity interventions designed to give people an opportunity to improve their health and facilitate rehabilitation. A review of the literature indicated benefits to developing further understanding of the role of identity (re)construction, embodiment and physical activity in supporting adult desistance from crime. A narrative approach was adopted to explore the embodied, lived experience of people with criminal convictions and life transformation. Approval was gained to access prisons and probation units in England and Wales. Through purposeful sampling, life history interviews were conducted with 16 adults, 13 males and 3 females, with criminal convictions to explore their experience of change. Six people were successfully desisting from a criminal lifestyle, eight were trying to desist, and two were still involved in crime. 14 semi-structured interviews were also conducted with Criminal Justice staff. A narrative analysis was undertaken to explore the personal and public stories. Firstly, exploring the \textit{whats} (what does the story tell us? Lieblich et al., 1998; Riessman, 2008) and, secondly, the \textit{hows} (what do the stories do? Frank, 2010). From this analysis and interpretation six aspects of transforming criminal lives were identified and explored: embodied transformation, physical activity, spirituality, age and wisdom, claiming an adaptive identity, and maintaining change. These are represented in the thesis through modified realist tales, creative non-fictions and confessional tales to illustrate their role in the process of desistance from crime. Through the analysis, a six-domain ‘web’ model is proposed as one possible way to conceptualise the active, interdependent and ongoing nature of participants’ journeys in transforming their lives. Finally, implications of the study are reflected upon in relation to theory, practice and future research.

**Chapter One: Introduction**

1.1 Autobiographical positioning                                         11
1.2 Context                                                             12
1.3 Outline of thesis                                                   14

**Chapter Two: Laying a foundation**

2.1 Introduction                                                        16
2.2 Rehabilitative role of physical activity                            16
    2.2.1 Value of physical activity                                      17
    2.2.2 Theories of how physical activity reduces crime                18
    2.2.3 Studies of physical activity and crime                        19
    2.2.4 Implications                                                  21
2.3 Desistance literature                                               22
    2.3.1 Defining desistance                                           23
    2.3.2 Theories and models of desistance                            23
    2.3.3 Desistance studies                                            29
    2.3.4 Implications                                                  31
2.4 Narrative approach                                                 33
    2.4.1 Narrative identity                                            33
    2.4.2 Implications                                                  35
2.5 Theoretical frameworks                                              36
2.6 Research purpose and foci                                           36
2.7 Summary                                                            37

**Chapter Three: Methodology**

3.1 Introduction                                                        38
3.2 Purpose and paradigms                                              38
3.3 Rationale for qualitative research                                  39
3.4 Research strategy

3.4.1 Narrative inquiry
3.4.2 Life histories and stories
3.4.3 Sampling
3.4.4 Gaining access

3.5 Research techniques

3.5.1 Life history interviews
3.5.2 Semi-structured interviews
3.5.3 Research journal
3.5.4 Data organisation

3.6 Research relationships and ethics

3.6.1 Ethics
3.6.2 Ethical dilemmas

3.7 Analyses and Interpretation

3.7.1 Phase one
3.7.2 Phase two
3.7.3 Phase three
3.7.4 Phase four
3.7.5 Analysis and interpretation summary

3.8 Representation

3.9 Judging a qualitative study

3.10 Summary

Chapter Four: Transforming bodies

4.1 Introduction

4.2 Sociology of the body

4.2.1 Embodied social action
4.2.2 Narrative body
4.2.3 Approach to analysis

4.3 Physical aspects of transforming a life

4.3.1 Habits
4.3.2 Crises
4.3.3 Creative transformation
4.3.4 An ‘unexplainable’ aspect

4.4 Acquiring physical aspects

4.4.1 Embodied care
4.4.2 Physical capital

4.5 Summary
# Chapter Eight: Ageing wisdom

8.1 Introduction

8.2 Age feel
   8.2.1 A critical age
   8.2.2 Too old

8.3 Time
   8.3.1 Missing out
   8.3.2 Timing

8.4 Physicality

8.5 Outlook on self and life
   8.5.1 Slowing/settling down
   8.5.2 Risk

8.6 Growing up and becoming wiser
   8.6.1 Wisdom

8.7 Summary

# Chapter Nine: Keep going

9.1 Introduction

9.2 Meaning of success and ‘a good life’
   9.2.1 Staff meanings of success
   9.2.2 Participants’ meanings of success and a good life

9.3 How to keep going: role of resilience
   9.3.1 Resilience framework
   9.3.2 Agency/mastery
   9.3.3 Relatedness
   9.3.4 Awareness and identity
   9.3.5 Religious coping
   9.3.6 Perseverance, persistence, patience
   9.3.7 Humour

9.4 Seeking balance

9.5 Summary

# Chapter Ten: Reflections and implications

10.1 Introduction

10.2 Autobiographical reflections

10.3 Making sense of transformation
   10.3.1 Understanding the ‘moment’ of transformation
   10.3.2 A domain-based understanding of transformation
   10.3.3 Possibilities and problems of models
10.4 Theoretical implications: selves, bodies and physical activity 212
   10.4.1 Theorising desistance and life transformation 212
   10.4.2 Rehabilitative role of physical activity 217
10.5 Policy and practice implications 219
   10.5.1 Physical activity and leisure 219
   10.5.2 Stories and narrative resources 220
   10.5.3 Support and environments 222
10.6 Limitations 223
10.7 Future research and possibilities 225
10.8 Summary 228
